JAMES HOSKING, Esq., No 6, Sun Court, Cornhill.

1. It is proposed to form a company under the above designation for the purpose principally of smelting the ores from the mine, and for the manufacture of every description of marketable iron and steel. The Fitzroy iron and coal mines are situated at Mittagong, in the county of Camden, and are about 76 miles from Sydney by the present dray road. They are immediately on the line of the Great Southern Railway, which, when so far completed, will bring them within three hours' ride of the metropolis.

2.—The peculiar richness of the metal, its adaptation to every purpose to which iron can be applied, and its easy convertibility into steel has been long ascertained and acknowledged by all who have given any attention to the natural resources of the colony.

3. A minute description is rendered unnecessary by the well-known character of the mines; but an extract from a report recently made (6th June, 1859) by J. H. Thomas, Esq., C.E., engineer and locomotive superintendent to the existing lines of railway, may not be out of place. Mr. Thomas says:—"With respect to the quality of these ores, I beg to state that an average of eight different experiments, made by assay, gave 64 per cent. of metallic iron; the remaining component parts consisting of oxygen, water, silica, and alumina. This result, as compared with the average of British ores, is extremely rich. It must not, however, be expected that the "make" from the furnace will be in same ratio, as, no doubt it will be found necessary to reduce, to prevent its too rapidly passing through the furnace. I am, however, of opinion, that, IN PRACTICE, the yield will be from forty to fifty per cent. I have had a few working experiments made of some malleable iron which your chairman, Mr. H. W. Johnson, sent me, on my return from Mittagong. They have been made by Mr. Twiss, our foreman of locomotives, a very skilful workman, of extensive experience in similar works in the United Kingdom. He describes this iron as working like that of the Lowmoor, the quality of which is the best in England. For the present, I have directed that he should use up such pieces as I have given him for repairs, &c., for the engines; and I have requested Captain Martindale to allow this iron to be tried on a large scale on the railway machinery. The superior richness of this ore, equal, at least, to any of the most valuable of those of Sweden or North America, would most assuredly secure for it an extensive demand in England for conversion into the finest steel. For the purposes of the Sheffield manufacturers, I have no hesitation in pronouncing an opinion, that for all the finer operations of cutlery, such as surgical instruments, razors, and the many varied articles for which steel of the highest quality is required, the ore which I am describing is, perhaps, superior to any that is now obtainable by the English cutlers. And here, I would suggest, that the high value of this ore, double to that of English mines, must never be lost sight of by the Company, whether their operations be mercantile or manufacturing. And I would further remind the Company of the prestige which their ores would, at once, obtain in every manufacturing country in the world, when it was known that their value, for the finest requirements of cutlery, was recognised by the Sheffield and other British manufacturers."

4.—The ore at the Fitzroy Mines, though extending to a very considerable depth, lies immediately on the surface, with naturally formed adits, and consequently as compared with similar descriptions of property in Europe and other parts of the world, the labour required will be but trifling, and from the great purity of the ore consequent on its having in a primitive state been subjected to some natural process, the expense attending the usual mode of smelting will be greatly diminished.

5.—The mine is in the centre of the freehold property, which covers an area of 600 acres; immediately adjoining a coal field of great extent has been discovered, the product of which has been described by William Keene, Esq., Government Examiner of Coal Fields, as "a free burning, bituminous or caking coal, fit for household or manufacturing purposes, and convertible into good coke." This field underlies a considerable portion of the 1000 acres leased by the Government to the present proprietors, and runs for some distance into the Fitzroy Estate.

6.—Four seams of coal have been found in a sinking of 100 feet, and the principal shaft is distant only one and a half miles from the works, with which it is intended to connect it by a tramway. It may be here mentioned that from indications similar to those which led to the discovery of the richest seam on the estate, it is expected that one of equal extent will be found within a hundred yards of the proposed site of the furnaces.

7.—Beds of fire clay, several feet in thickness, extend over a considerable area, from which the purest fire-bricks (equal to Stourbridge) and most enduring crucibles have been made.

8.—The machinery, plant, &c., on the ground consist of

One 40-horse-power engine, with adequate boiler power, and connected by gearing with a complete set of merchant, railway bar, and boiler-plate rolls

One 12-horse-power engine, working stones for grinding fire clay

One 12-inch centre lathe

Blowing fan for small blast furnace

One 5-ton tilt hammer and squeezers

Iron work complete for one blast furnace

Resident's house, men's cottages; carpenters', pattern makers', blacksmiths', and brassfounders' shops; ore house, foundry and stove, cupola for casting, stove for drying firebricks, kilns for lime and bricks, cupola for melting ore, capable of producing twenty tons weekly; engine-houses, offices, stables, crabs horse gins, tenton weighbridge, drays, horses, bullocks, quarrying and other tools, mining implements, &c., &c.

9.—A contract has been entered into with Messrs. William Fairbairn and Sons, of Manchester, for the construction of

1.—A blowing engine of 100 horse-power, with boiler power equal to 160 horses.

.—The iron work complete for one smelting furnace and one refinery, with the connecting blast pipes and air receiver between the blowing cylinder and furnace.

The engine and cylinder are sufficiently powerful to blow two smelting furnaces, and the piping all throughout of sufficient capacity for that purpose.

This machinery will be capable of producing from 160 to 180 tons of pig iron weekly.

10.—The eminent firm alluded to are preparing estimates and plans for a proposed extension to four furnaces, which would make the yield 750 tons weekly; they stated that "if such addition were made, there would not be more complete iron works in the world."

11.—Messrs. Fairbairn, in conjunction with the Company's Agent in London, have been requested to select and engage a practical Manager for the Company. This gentleman will have the entire supervision of the working department, subject to the control of the Board of Directors.

12.—The estimates that have been made of the probable expense and returns on the working of these mines are based on the highest rate of wages and the average colonial price of the metal—and still promise a very handsome return, which it must be recollected will be considerably increased by the large saving in carriage that will ensue when the railway—already completed half-way to the property—shall be actually extended to it. The very general substitution throughout the world of iron for wood, especially in ship building, has rendered it exceedingly difficult in England to complete contracts of any magnitude; the demand greatly exceeds the supply and prices have consequently risen. It is calculated that the iron manufactured at the Fitzroy Mines can be delivered in Sydney at a cost of £8 per ton, including all expenses, and at present rates of carriage. The market value of this would be from £12 to £14 per ton, and its great superiority to the common English bar iron would ensure a ready sale. Taking the lowest of the abovenamed prices, the profit per ton would be £4, which on the quantity that the machinery ordered could easily turn out, say 150 tons per week, would give a clear net revenue of £600 per week—£31,020 per year, say over 30 per cent. on the capital invested. But the promoters of the Company, while proposing in the first instance to lay themselves out for the manufacture of the description of metal principally required by the colonies, have also in contemplation the production of steel for the English and other markets, which they consider will eventually prove their most fertile source of revenue.

13.—It will be seen by the quotation from Mr. Thomas' report that the Fitzroy ores do NOT contain phosphorus. The following extracts from a private letter received by a gentleman in this city from H. Bessemer, Esq. (whose name is so intimately connected with improvements in the manufacture of iron and steel), are well worthy of especial attention:—"You are quite right in supposing phosphorus is the great enemy I have to contend with in my new process. So injurious is it that one-fourth per cent. quite destroys the malleability of the metal; so difficult is it to remove from crude iron that it has hitherto been found impossible to do so sufficiently to make the best steel. It can only be made from iron containing no phosphorus, or at least only a trace; hence we still continue to purchase thousand of tons of iron from Sweden, at £30, and even £35, per ton: the foreign iron for making steel has never contained any phosphorus." After describing the action of charcoal on iron containing phosphorus, and the several appliances patented by him, Mr. Bessemer proceeds:—"We are now tilting steel at Sheffield, made direct from crude iron (by a partial decarbonisation), which is worth from £60 to £70 per ton; indeed it works in every respect equal to the best steel known in the trade. We are using for it American iron which in its crude state contains only 93·04 per cent. of iron, but when refined by my process averages 99·7 of pure iron. There are many mines of iron in the world containing little or no phosphorus, and it is to these sources that we are at present directing our chief attention, with the view of its immediate introduction for commercial purposes."

14.—The cost of production of steel of Mr. Bessemer's patent (which would require very little extra machinery) is estimated to be £9 per ton at the mines, while the value of the Fitzroy steel in the English market would be from £60 to £70 per ton. It is not necessary to remark upon the prospect of revenue which the successful carrying out of the manufacture of steel on the above principle holds out to the Company.

15.—With a view to the completion of the capital, a limited number of shares is now offered to the public, for which applications will be received until the 16th January, 1860, upon the following terms, viz:—

£1 on application.

£2 on allotment.

£2 two months after allotment, and the residue by calls as set forth in the deed of settlement.

16.—A special general meeting of shareholders (in the proceedings of which all to whom shares may now be allotted will be entitled to take part,) will be called as early as possible after the allotment is made, when the deed of settlement will be submitted, and the election of directors, trustees, and auditors, will be proceeded with.

17.—Forms of application with any further information that may be desired, can be obtained from the undersigned, or from the duly appointed agents.

FIRE INSURANCE.—SYDNEY INSURANCE COMPANY.
Office, corner of Pitt and Hunter streets, Sydney.
Incorporated by Act of Council, 18 Vict., 1855.
Subscribed Capital £250,000

Directors:—
S. D. GORDON, Esq., M.L.A., CHAIRMAN
RICHARD JONES, Esq., M.L.A., DEPUTY-CHAIRMAN
T. C. BREILLAT, Esq.
M. E. MURNIN, Esq.
JOHN FAIRFAX, Esq.
THOMAS HOLT, Esq.
Surveyor—JAMES HUME, Esq.
Secretary—Mr. JOSEPH DYER.

Within the last four years this company has paid for losses by fire the sum of £15,508 5s. 0d.

The directors would point out the public advantages derived from the establishment of this truly colonial institution. The rates of premium on fire insurance have been reduced 75 per cent. below the rates charged by the English companies some few years back—and they are now as low as those charged by the English companies established here. The liability of a large body of wealthy shareholders is unlimited, so that a security equal to the largest subscribed capital of the English companies is assured, with the great advantage of the security being in the colony, and lastly, the profits of the company are retained in the colony, instead of being transmitted to England.

BUILDINGS—metal or slated roof, stone or brick, from 2s. 3d to 6s. 6d. per cent.

BUILDINGS—shingled ditto ditto ditto, from 3s. 9d. to 10s. 6d. per cent.

WOODEN BUILDINGS—metal or slated roof, 8s. and upwards. Shingled, special.

Agents are appointed in every considerable town in the colony.

N.B.—There is no exemption made in the above company from payment of losses occurring through bush fires, country properties being insured against such casualties.

ROYAL HOTEL, Honeysuckle Point, Newcastle.—Mr. JAMES SMITHERS respectfully apprises his numerous kind friends in the capital and provincial towns, that he has taken the above hotel, which he has newly fitted up, with every possible regard to the convenience of gentlemen and families visiting Newcastle.

The proprietor enters into the Royal Hotel with the fullest confidence in his ability to give satisfaction to those he may have the honour to entertain.

HUGHSON begs to inform the public that he has REMOVED from Louisa Creek to Mudgee, where he has opened those large and commodious premises recently erected at the corner of Market and Lewis streets, and opposite to the Royal Mail Booking office, as a first-class Commercial and Family Hotel, and solicits the patronage of his Sydney and country friends when visiting Mudgee, as also the inhabitants of the town and district; in doing which, it may, perhaps, be necessary to state that he has gone to very considerable expense in fitting and furnishing the hotel, in order to make it second to none in the colony for comfort and convenience.

R. R. H. would further beg to draw attention to the arrangements he has made in the cuisine and other departments, so essential to the comfort and satisfaction of those who have occasion to make an Hotel a temporary home, having engaged all his employés with a strict regard to their efficiency in the several branches of their business.

The arrangements for families have been made with a considerate care for the comfort and privacy of those who may patronise his establishment; and in conclusion he would impress upon the public that his charges will be so moderately adjusted, that they must insure entire satisfaction.

J. G. MARZETTI and SON'S superior London-bottled ALE and PORTER.—CAUTION.—In consequence of the numerous piracies of this old and favourite brand by persons making use of fictitious labels, Messrs. J. G. Marzetti and Sons have adopted the use of Betts' Patent Metallic Capsule, and none of their beer is genuine unless the cork is so covered and stamped with their name and trade mark.

Shipments of the above to arrive.

NOTICE.—Whereas it has come to our knowledge that boots and shoes, bearing our brand "P. & Co." (on the soles), and not of our manufacture, have been exported to the Australian colonies for sale without our knowledge and privity, we hereby give notice that the parties so acting are amenable to the law, and that, if such practices are continued after this notice, legal proceedings will be taken against them. All boots and shoes manufactured by us on and after the 1st day of January, 1859, will bear the following brand:—

WATER, WATER, WATER.—CAPPER'S SCATURIGINOSUM; Or, Registered WELL BUCKET and LIFTING GEAR, For Watering Stock, Emptying Mining Shafts, &c.

The advantages which are derived from using are as follows:—

1. That by this method the manual labour of the windlass is dispensed with, and that of horse or other motive power applied.

2. That a much larger quantity of water, in a shorter time, and by a simpler method, can be raised, than by any other means generally used.

3. That water can be raised from any depth.

4. That as there is no complicated machinery in the gear, the possibility of the apparatus being rendered useless by any part being broken is prevented, as any ordinary blacksmith can repair or make any part should an accident occur.

5. That the bucket filling by the valve at the bottom, the necessity of making the well sufficiently large to cant the bucket is obviated—thus saving a great expense in the first outlay.

6. That the necessary framing, &c., can be erected by any person at all accustomed to rough carpentering, and that all or any part can be furnished in duplicate or triplicate.

Any person desirous of obtaining a lithographic plan, showing the bucket and working of the gear, will receive one by post, on application to EDWARD P. CAPPER, Skew Store, West Maitland.

PROFESSOR BARRY'S CELEBRATED TRICOPHEROUS.—The third shipment of this most valuable preparation, for the Head and Hair, has just been imported by W. H. GLOVER, of Sydney, who has been appointed sole agent for Australia and the colonies.

In introducing any new article, it is customary and indeed necessary to make a few remarks respecting it, by way of giving it publicity; in doing so, I shall merely state one or two of the leading properties of this medicated compound.

☞ Professor Barry's Tricopherous has been patronised and adopted by the most eminent of the faculty. It has stood the scrutiny of the most fastidious for thirty years, and he feels great confidence in recommending its use to the ladies, gentlemen, and men of business in Australia.

This compound will be found the most efficacious wash ever introduced for thoroughly cleansing the head of scurf and dandriff; it is also invaluable for beautifying ladies' hair. Independent of this, it possesses for the business man the most delightful reviving qualities, imparting great coolness to the head, and gives a freshness to the brain, after close application or study, which can only be appreciated by the experience of its application—and is so desirable in hot climates.

With these few remarks W. H. G. feels convinced that it only needs "one trial"—as it will speak volumes for itself.

In order to facilitate my arrangements throughout the colony, I have appointed Mr. JOHN PEARSON, George-street, Sydney, near the Royal Hotel, wholesale and retail agent, to whom I refer the trade for their supplies.

Sold in bottles, 2s. 6d each.

W. H. GLOVER, 139, Castlereagh-street, Sydney.

WATSON'S NEWLY DISCOVERED WORM POWDERS.—Price One Shilling each.—These Powders have now been upwards of four years before the public, during which period they have been most extensively and successfully used by persons of all ages. The extraordinary success attending their use has called forth a host of imitations, against which the public is particularly cautioned. The original and only genuine powders are prepared only at WATSON'S Drug Stores, 593, Brickfield-hill, where they may be had wholesale and retail.

N.B.—Parties at a distance must be particular in stating the age.

They can be forwarded by post.

The attention of invalids generally is requested to this, on account of the manifest impossibility of carrying into effect the wishes of the physician unless his prescriptions are conscientiously followed by those upon whom falls the duty of dispensing. 334 (late 187), George-street, Sydney, between the Post Office and Hunter-street.

SYDNEY GALLERY OF PHOTOGRAPHIC ART. Established 1853.

Messrs. FREEMAN, BROTHERS, Photographers by appointment to his Excellency the Governor-General, in entering upon the eighth year of the above establishment, return thanks for the highly distinguished patronage they have received, and promise unremitting efforts in practising every branch of Photography, so as to ensure a continuance of that approbation which has hitherto accompanied their efforts. Having just received a stock of the purest chemicals, from the best sources, and added fresh and superior apparatus, they flatter themselves that these additions, combined with the advantages of their new and spacious atelier, have placed them in a position for taking the most artistic and pleasing pictures in the shortest possible time—a combination of advantages highly conducive to the best photographic results.

While determined to maintain that position which only a remunerative business can bestow, Messrs. Freeman also wish to meet the emergencies of the times, and have resolved on commencing the year with a new scale of prices, which they have carefully arranged to suit the wishes of the various visitors who may favour them with a call. In doing this with a due consideration of the necessities of the times, they are thoroughly determined to relax no effort in producing the class of pictures for which they have been distinguished, and which their arrangements enable them to carry out, and those who visit their establishment may depend on procuring, in whatever portrait they may require, the combined advantages of fidelity, artistic arrangement, and the most delicate colouring.

CRAYON COLLODIOTYPES.

These beautiful productions, originally introduced by Messrs. Freeman, are equal in delicacy of colouring to the old enamel painting; can be had within a few hours' of taking, and are especially adapted as presents to friends.

PHOTOGRAPHY ON PAPER.

This important branch of the art is carried on by Messrs. Freeman in all its varieties. Plain, coloured, and vignetted portraits can be had in all sizes, either for hanging on the walls, or for transmission in an ordinary note-sized envelope. The negatives are kept carefully in stock, so that impressions can be taken at any time without involving the necessity of another sitting.

PORTRAITS OF CHILDREN.

The peculiar advantages of their Atelier, enable the Messrs. Freeman to take the youngest child by a perfectly instantaneous process.

Views of the Harbour and neighbourhood constantly on hand, and private residences, or other special views, taken as may be required.

Photographic apparatus and material on SALE, and instructions given in the art.

392, George-street, next door but one to the Post Office.

ADELAIDE TELEGRAPHIC AGENCY.—Mr. W. H. FLOOD, late of Queenscliffe, RECEIVES and TRANSMITS TELEGRAMS, either to or from Europe, on arrival or departure of the mail steamer. Terms 10s. 6d. each message, not including price of telegram.

Mr. Flood would suggest to the merchants of Melbourne, Sydney, and Tasmania that their European correspondents should forward to him by each mail a brief epitome of their most important intelligence for immediate transmission. Strictest secrecy guaranteed. The benefit of this agency will be to enable merchants to receive their news in advance of their letters, and also to send several days' later intelligence to Europe. Telegrams for outward mail should be sent previously to the first of each month.

R. Wilshire has any legal claim to or authority to receive the said outstanding debts.

JOHN MORRIS, official assignee. Mort's-buildings, Pitt-street, Sydney, December 24th.

THE LATE EMPIRE NEWSPAPER.—We, the undersigned, certify that we have renounced all claim to the BOOK DEBTS in the estate of Mr. HENRY PARKES in favour of Mr. J. IN THE ESTATE of the late Mrs. ROSETTA TERRY.—Valuable PROPERTY in Pitt-street North, consisting of a large Block of Land, with extensive buildings thereon.—FOR POSITIVE SALE in one lot, by TENDER.—The executor and executrixes of this estate offer for sale the whole of the land, dwelling-house, offices, out-buildings, and extensive stores, lately occupied by Mrs. Rosetta Terry, on the west side of Pitt-street, between King and Hunter streets.

The land has a frontage to Pitt-street of 108 feet, by a depth to the tank stream of 140 feet.

The dwelling-house, built of brick, is of a substantial character, containing 4 rooms on the ground floor, and 6 rooms on the first floor, with the necessary kitchen, offices, and back verandahs.

There is also a very extensive three-story brick-built store, garden, coach-house, and stables.

There is also an allotment adjoining the above, bounded on the south by Mort and Co.'s premises, containing about 21¼ perches, more or less—may be included or tendered for separately.

This property to be appreciated should be inspected, which can be done any day between the hours of 2 and 6 o'clock p.m., upon application to Miss FOX, on the premises, who will give every information as to terms, &c.

Tenders for the purchase of the above to be addressed to Miss FOX, on or before the 12th day of January, 1860.

SENIOR and ABBOTT, 262, George-street, opposite the Bank of Australasia, beg to announce to the inhabitants of Sydney and suburbs that they have opened, in the above premises, as Dispensing and Family Chemists, where they are determined to give the strictest personal attention to any favours with which they may be entrusted, to employ none but thoroughly qualified assistants, and to use only the purest and most select drugs and preparations, for which purpose they have imported a most replete stock of drugs, chemicals, and pharmaceutical preparations from the celebrated Apothecaries' Company, of London, than which there can be no greater guarantee of purity and excellence. The numerous advantages which they have derived from many years' practical experience in the first dispensing houses in London and provinces enables them to state with confidence that physicians' prescriptions entrusted to them will be dispensed with the most positive accuracy, under the immediate supervision of one of the principals and in compounding family recipes most scrupulous exactness may be relied on. Their miscellaneous preparations for family use will be found of uniform excellence, and especially deserving the notice of heads of families, squatters, and country residents generally.

HAPPY NEW YEAR.—

Again the year has wound it's lengthy way,
And we, once more, are hailing New Year's Day,
Smooth gliding Time, with steps so light and fleet,
Attains once more the hour when two years meet.
Let all who witness this event again
Greet Eighteen Sixty with a joyous strain.
Cohen and Co. would on their friends impress
Their grateful thanks for all their past success.
Although the Times have often been felt hard,
And many from success have been debarred,
Still ever on the increase, Cohen's trade
Has gained fresh triumphs, fresher converts made.
When great depression on the Sydney public fell,—
High rents, scant trade, their usual stories tell;
Still Cohen's prices, at their Monster Mart,
Would greet the struggling man, and cheer his heart,
With first-class Clothing in the newest style,
At prices that have gained each patron's smile.
When Opposition has with scheming toil
Attempted Cohen's trade and fame to spoil
By lengthy puffs, whose weakness all could view,
And no one for a moment deem them true.
Still Cohens' have around them gathered friends
Whose constant custom made to them amends.
Then in the year now dawning on the earth,
Australians still shall feel H. Cohen's worth;
His Halls shall clothe in every newest style,
His efforts spoiling each opponent's wile.
And thus with fashion, texture of the best,
H. Cohen dares to stand the public test—
His scale of prices proudly can display,
Nor fear to drive his customers away.
Come then, if suits for holidays you'd buy,
To Cohen's hasten, their professions try,
You'll find the fame, which unto you doth call,
Is well deserved by Cohen's Monster Hall.
Cohen and Co. wish all their friends sincere,
Most happy days in this the coming year.
And trust to often see them,—one, and all
With happy faces, at their Monster Hall!

JAMES HENNESSEY and CO., of Cognac.—Several remarks having lately reached us from London shippers, that their friends in Australia complain of the large sized bottles and full strength of our shipments of Brandy in one dozen cases: we think it right to inform importers and consumers that our twelve bottles of brandy have always contained, and will continue to contain, from 1 28-32 gallon to 1 31-32 gallon, and at strength of 11 to 12 under proof. We are informed by our agents, Messrs. Twiss and Brownings, of 47, Mark-lane, London, that some other houses ship one dozen cases brandy in smaller sized bottles, and at a lower strength, but we think it right to inform the Australian public that we shall adhere to our standard sized bottles and strength. PATENT PHOSPHURETTED YELLOW METAL SHEATHING.—The undersigned, who are in constant receipt of shipments of the above, beg to call the attention of shipowners, masters of vessels, &c., to its superiority to that of other makers. The ship Blackburn, of 959 tons, was sheathed in February, 1858, with 1838 sheets of the Phosphuretted, and 535 sheets of the ordinary sheathing, and on her return from Calcutta was carefully examined by practical men, who certified that the Phosphuretted did not show the slightest wear, and that the ordinary was nearly half worn.

The Light of the Age.—This fine clipper left the Downs on the 2nd October, in company with the Walter Hood, also bound for this port, and has made an excellent passage of eighty-eight days. She was off the Lizard on the 5th October, passed Madeira on the 16th, in company with the Prince of the Seas, from Liverpool, to Madras, and also the Walter Hood, who remained in company for four days. On the 24th, passed the Cape de Verds; on the 28th, in latitude 7 19 N., lost the N.E. trades, and crossed the equator at noon, on the 3rd November; on the 21st passed Tristan d'Acunha, sighted Inaccessible and Nightingale Islands, and rounded the Cape of Good Hope fifty-four days out. Several large quantities of ice were sighted on the 1st December. The passengers speak most favourably of the comforts experienced during the voyage, and of the kindness and attention of Captain Gilson, her commander.

The Elizabeth, from Melbourne, carried away her jibboom and main gaff during the run up.

The Union left Melbourne on the 26th instant, and we are indebted to Captain Littlecote for papers up to Saturday last.

The Colonsay left the Downs on the 3rd September, but did not cross the Equator until the forty-fifth day out, which accounts for her long passage. The only vessel sighted during the run out was the Star of Tasmania, from Launceston to London, on Saturday last.

The Martha Ellen was in company with a large ship from Melbourne, bound north, and parted with her off the Howe.

The Sydney Morning Herald.

SATURDAY, DECEMBER 31, 1859.

The tantalizing obscurity of our last English telegram, has condemned us to a month's conjecture, and created a deep anxiety among susceptible people. Thus, as at home, we have our Bulls and Bears—who divide among them the domain of possibility, and people it with the phantoms of alarm or the illusions of hope. The Bulls all serene, cherish the more pleasing anticipations — and watch with patriotic views the fluctuations of foreign politics, always interpreting them on the British side. The Bears, as their name would suggest, are full of gloomy prognostics, and render in an hostile sense all the movements of foreign Governments and armies. The gentry of the Exchange alley, whether Bulls or Bears, are looking, however, to the effect of their visions on the Consols. They buy for a rise or a fall. They can scarcely be true patriots who speculate on the misfortunes of their own Government and country. The colonial Bulls and Bears are of a less marked character; they too, however, have their interest apart from their citizenship. They probably feel as much interest in the price of tea as in the fate of the British arms in the Chinese waters, and they form a calculation on the value which would be added to their colonial stores by the addition of the cost of convoy and insurance.

Our impression of the import of the last news is not more unfavourable on reflection than upon the arrival of our last published telegram. The tone of such a brief communication would be deeply affected by the use or the omission of a single word. The rapidity with which a report can be taken up and propagated, and the difficulty of overtaking it with explanation or contradiction, is illustrated in the well-remembered incident of the Crimean war. A stranger without a line of writing, or any public authorisation, a mere Tartar, spread the report, and it was accepted because it was desired. Probably the man who announced the fall of Sebastopol had himself been the dupe of probabilities, and hastened to convey tidings which he knew instinctively would be received with rapture.

Never was any report more deserving of the wire which diffused it with lightning speed from the moral effect which it produced. It was indeed electric. Proclamations, thanksgivings, illuminations, all forms of national rejoicing were witnessed in England, France, and in all countries, sympathising with what were deemed the liberties of Europe. We all remember that even then a suspicion permeated society that we had been duped by our own enthusiasm. We all remember, too, that thousands of the bravest, the strongest, and most aspiring of our armies were first to sacrifice their lives ere the premature anticipation could be realised.

The author of a telegram then may be perfectly sincere, but his main fact may be erroneous, and thus the impression entirely false. It has been suggested that the warlike communication—that from Aden—was intended to excite a false alarm. We see no reason to credit the imputation. Had the author designed any imposition he would surely not have given the price of Consols as within a fraction of the last quotation. He might have omitted this item of intelligence altogether, if he had not the hardihood to make it tally with the general purport of his message.

Our own private telegram is dated London, November the second. Although not altogether satisfactory, it gives no indication of the differences between England and France. The war telegram, if we may so call it, is dated London, November the first, and Aden, November the second—thus showing an earlier date than the more favourable communication of our office correspondent. We pretend to afford no clue to the mystery. The question, however, would be, namely, Were there really facts at the time of the war telegram to indicate the serious differences understood from the suspension of the preparation for the expedition to China? Was the statement founded upon rumour circulating in the city, traceable perhaps to stock-jobbing impressions, or was it the result of authentic communications? Even supposing that there was a suspension of the preparations for the China expedition on the part of the French Government, we do not see that it would necessarily imply a separation of policy. Looking carefully into our files of papers it is quite clear that the policy of England was by no means satisfactory to her Statesman. The account which had reached home of the sacrifice of valuable lives by treachery, awakened of course the strongest resentment. A more calm survey of all the circumstances would perhaps lead to the impression that our countrymen were more valiant than discreet. If the conditions of the treaty did not prescribe an entrance by a particular channel they could have no just right to compel that channel to be opened. Their treaty warranted their appearance at Pekin, but it did not warrant them in violating the right of an independent State to shut up a particular passage, or to withdraw it from the highway of nations.

The preparation for resistance certainly argued an expectation that this would be the channel of approach, and manifested an unfriendly as well as ferocious spirit; but it is not upon such grounds that nations can safely make war. If, therefore, upon more deliberation the British Government be resolved upon the pacific settlement of the difficulty, the preparations of France would be naturally suspended. It is indeed possible that the alliance may be so insecure as to check any remote co-operation. Were the French and the English to be involved in war, the soldiers engaged side by side would be in danger of turning their arms against each other. A fine spectacle for a Pagan nation! and for a nation too upon whom we are about to impose the duties of European civilisation. We, however, think that the suspension of the preparations for China will be found attributable to other than unfriendly relations with our gallant neighbours.

It is one of the advantages we enjoy in possessing a free Press that we can awaken attention to all that is apparently dangerous to the national safety; that if our Ministers slumber we have a right to rouse them by pointing out the perils which oppress the national mind. But there is a danger accompanying this precious privilege. Supicion is unfavourable to friendship. The disturbance of that confidence which two great nations need to cherish in each other is really a calamity to both. Nations differ nothing from individuals excepting that they have a larger stake in those fluctuations of sympathy and aversion, which unite or separate them from each other. The follies, therefore, of John, Dick, and Harry, which we see every day produce a thousand forms of mischief by disturbing their sanity and magnifying trifles, will not be less apparent in the triplicate and quadruplicate, or any greater number, of these amiable citizens.

Our part is to steer a middle course between the excitement of foolish and offensive suspicion and the still more deplorable apathy to those indications of European danger which may so tremendously compromise our own safety and peace. We must, however, wait for the solution of the mystery with what patience we can.

A rumour has reached us—we do not know whether it is well founded—that a notice is about to be issued to persons in the employ of the Government, that all who are so on the first of January, 1860, will forfeit their claim to superannuation allowances. Rumour is so prone to exaggeration, and the thing circulated is in itself so monstrous, that we should certainly hesitate to believe, although it is not on light authority that we are required to credit it.

If the Government of this country resolve hereafter to abolish the system of pensions and superannuation allowances, there can be no injustice in doing so. We are prepared to debate the propriety of this measure. Those who enter upon the service of the country with a knowledge that they are liable to be dismissed whenever age or infirmity shall overtake them—without the slightest consideration of the kind or length of service they may render—must of course make up their minds to this condition, and provide against it as best they can. Those, however, who have been in the service of the Crown, are entitled to the fulfilment of all the expectations which the practice of Government has hitherto warranted.

It is very true that these allowances are not absolutely guaranteed—that they are variable in themselves, and subject to some degree of contingency, but those variations and contingencies are only intended to adjust particular cases to a general and equitable rule. They were certainly never meant to afford any Government the chance of repudiation, or to stand upon exceptions and qualifications otherwise than in the spirit which suggested them.

We are informed that the state of the case, according to the forthcoming notice, stands thus: There are persons entitled to receive compensation for, say, fifteen or twenty years' service, more or less. If they have ceased from the employment of the Government on the 31st of this month they will be entitled to their superannuation, but if there be no such cessation of employment—if, in short, they are not qualified to claim, from infirmity or incapacity, or any other admitted cause, and remain then in the service of the Government one day longer, should they be immediately after the first of January smitten by affliction and be incapacitated for work, they will be sent adrift without any payment at all.

We say that we cannot credit this allegation. We believe it must be founded in some mistake. It was, however, circulated widely among the employes of Government, and created considerable consternation. But we cannot believe there is any Government, whatever might be its theory, which would venture on a cruelty like this. Nothing can be clearer than that all the expectations which were justified by the published regulations of Government ought to be fulfilled, and that to the letter. If there be any departure from them it should be in favour of the public servant who is entitled to his pension.

The late debate upon the salary of an officer who had been many years in the service of the Government, and who claimed his retiring allowance, disclosed a spirit essentially captious and unjust. It is useless when a man has grown grey in the service to enquire whether, through a long course of years he has been meritorious or not. It is sufficient that he is found, after those years, without any impeachment. The inference to be drawn is that the Governments preceding have not been less careful to scrutinise the merits of their subordinates than those now in authority. Whenever therefore, questions of this kind are raised, they indicate an ill balance of the moral sentiments in the parties who raise them. Such inquiries would justify the disturbance of every past bargain and render every future engagement insecure. There must be a time when things are deemed to be settled, and when they are no longer open to discussion because some individual may happen to dissent from the conclusions upon which they have been founded.

Unfortunately, in our Assembly there is no sense of moral responsibility. Men stand up and proclaim principles and defend proceedings which would assuredly cause their expulsion from any decent society elsewhere.

The question of abolishing these allowances hereafter will, we hope, receive deliberate consideration. We have reason to suspect everything which contradicts the experience of other and older states. When these allowances are provided, they really form part of the salary of the recipient. It is part of the consideration he receives for his services. He takes his chance of life and health with many who are united in the same service—and that chance is probably a slight one of receiving a farthing. Time, death, the various changes which take place in men's position, their disgust of the public service or their dismissal from it,—these are all deductions in the actual cost of such allowances to the State.

There is one consideration which ought to weigh with all before they exclude this provision. The service of the Government of itself disqualifies men for any other employment. The employees move in a very contracted circle. Their occupations are uniform, and they acquire great dexterity if possessed of ordinary ability; but beyond routine they are never likely to advance. Thrown off, therefore, from that particular kind of employment after having been engaged in it for many years, they are scarcely fit for anything else. Would not this be a tremendous consideration to any man charged with Government in removing from public employment persons whose age and infirmity had disqualified them for continuing it? It is all very well while we are dealing with mere abstractions and working out arithmetical problems, but when you come to face the servant of the public, faithful in all his career, having entitled himself to warm respect and esteem, and to feel that from the growth of infirmity, which time will bring, it is necessary to remove him from office. Who could venture to inflict the personal wrong for the sake of the public—who would venture to throw him upon the world to starve? When a man in this situation is to be met by our heads of departments, or even by a Prime Minister, iron and inflexible as he may be, although as unbending as a theory—his heart will nevertheless betray him, and he will retain in the service of the Crown those who ought to be retired from employment, and enjoying the few remaining years of life in the repose which good conduct and industry ought to secure to us all.

There are few things more gloomy in the position of men who fill offices of trust than that their substance depends upon their health, and that no length of service will enable them to provide for "the days of darkness"—which may be many. Private employments can rarely afford pensions, although they are not unknown in large and generous establishments, but it is an advantage which the Government possesses in its organization that such can be offered, and it is not lightly to be thrown away.

BATHURST.

Friday, 8 p.m.

The excitement occasioned in this town by the opening of the telegraph still continues. The telegraph office was crowded all day by persons sending messages, and the promptness with which the replies were received has given great satisfaction.

Business during the week has been dull. Prices remain the same as last week, with the exception of wheat, which is now quoted at 6s. 6d. to 7s. 6d. per bushel.

Weather fine.

GOULBURN.

Friday, 8 p.m.

Very little business has been done during the week in consequence of the holidays. No change in markets.

Weather cloudy, wind South-east.

MELBOURNE.

Friday, 6 p.m.

At a meeting of the Intercolonial Cricket Committee objections were raised to the reappointment of Mr. Tunks as umpire. The matter is reserved for consideration at next Thursday's meeting.

No trade doing.

No new failures, but money very tight.

ADELAIDE.

Friday Afternoon.

Much enquiry for wheat.

At present flour quotations are purely nominal.

Two cargoes of colonial timber were offered for sale to-day. The competition was slack.

The South Australian Government have chartered the steamer Young Australian, in lieu of Corio, for the conveyance of the English mails from Nepean Bay for the next twelve months. Notwithstanding, the Corio goes down for the mail to-morrow.

Weather warm.

The Port Regatta takes place on Monday.

Messrs. Alexander Moore and Co.—At their Mart, at 11 o'clock, Household Furniture, Pianoforte, Cooking Stove, Brussels Carpet, &c.

Messrs. Newman and Roberts.—On the premises, King-street East, opposite Cunninghame's, at half-past 10 o'clock, Wooden House, Household Furniture, Carpenter's Bench, &c.

Messrs. Lister and Barnett.—At the Great Eastern Boarding and Lodging House, Pitt-street, at 10 o'clock, Household Furniture, Fixtures, &c.

Mr. Foreman.—At 8, Taylor's Buildings, Botany-street, South Head Road, at 11 o'clock Household Furniture, and other Effects.

Mr. G. Seymour.—At Ridge's Sale Yard, Windsor, at 11 o'clock, Horses.

Burning on the Southern Train.—An unfortunate case of burning happened on Thursday, during the progress of the forenoon train from Campbelltown, to which place Mr. Craig, undertaker, of Goulburn, had brought the remains of a gentleman for the purpose of being conveyed to Sydney. On arriving at Ashfield, smoke and smell of fire directed those in charge of the train to the close carriage in which the coffin had been deposited; on opening it, it was found full of smoke, and the velvet pall burning on the top of the coffin, which was also partially burned. It is to be regretted that such a casualty should have occurred, particularly under such circumstances as the above, and no doubt strenuous efforts will be made by the authorities to prevent a similar case in future. It appears that the sparks from the engine had congregated at and burned one corner of the carriage, near the sliding-roof, and had also descended into the inside and fallen on the pall and coffin.

Ordination of a Missionary.—A valedictory and ordination service was held last night in the Wesleyan Chapel, York-street, previous to the departure of the Rev. W. Whittley as a missionary to the Fijians. As the vessel which is to convey Mr. Whittley to the scene of his labours sails much sooner than was anticipated, but little notice was given of the intended service, and the attendance was therefore very small. The services were opened with singing and prayer by the Rev. J. Eggleston, who afterwards explained the object of the meeting. The Rev. Mr. Whittley then addressed the congregation concerning his early life, his conversion, and call to the ministry. The ordination service was read by the Rev. Mr. Rabone, the chairman of the district, who was assisted in the ceremony of laying on of hands by the Rev. Mr. Eggleston and the Rev. Mr. Ironside. After the Communion had been administered to all the clergymen present, an address and exhortation was delivered to the newly-consecrated missionary by the Rev. Mr. Rabone. The service closed as it commenced with prayer and singing.

United Presbyterian Church.—A juvenile soirée in connection with the United Presbyterian Church, in Phillip-street, took place last night in the church, when a musical class, instructed by Mr. M'Cormack, the superintendent of the Sabbath school, sang some anthems and other sacred pieces very creditably. Mr. M'Cormack, who was a pupil in Mr. Chizlett's classes, has evidently taken great pains in improving the young folks in the practice of this delightful art; and their presentation to him last night of a gold pencil case and some valuable books proves that they appreciate his useful efforts both in the music class and in the Sabbath school.

Brewers and Spirit Merchants Registration.—Spirit merchants and brewers are reminded that this is the time for renewing the registration of their stores, &c, as required by the 14th section of the 13th Victoria No. 26, and that neglect in this matter involves a liability to heavy penalties.

Auctioneers' Licenses.—Special licenses to carry on business as auctioneers, were yesterday granted to William Pritchard, John E. Irwin, William Dean, William E. Day, Samuel Payten, Thomas Dawson, William P. Peck, John D. Fortheringham, Henry Myers, Isaac E. Cohen, Robert Muriel, Thomas Underwood, John C. Molloy, Richard G. Vallack, and James Monoghan.

Cricket.—A match between eleven of Prospect and eleven of the Smithfield cricketers, came off on the 26th instant, at Mr. J. Kenyon's paddock, the use of which he kindly granted for the occasion. The following was the result:—

VICTORIA.

We have two days later news from Melbourne, viz., to the 24th instant.

The following extracts are from the *Age*:—

The Bill to Amend the Laws relating to Insolvent Debtors, brought into the Assembly by Mr. Ebden and Mr. Michie, has just issued from the Government Printing Office. It is a most voluminous measure, comprising no less than two hundred and twenty-seven clauses, to which are appended twenty-nine schedules.

147 births and 107 deaths have been registered in Melbourne and suburbs during the past week. Out of 26 deaths at Collingwood, 21 were of children under 3 years of age. Of 50 deaths registered in Melbourne, 28 were of children under 3.

The City Baths were thrown open to the public on the afternoon of the 23d instant. By way of commemorating the occasion persons were allowed to bathe free of charge. In the evening the building was lighted with gas, and large numbers of persons availed themselves of the bath. The machinery worked in a satisfactory manner.

The Caledonian gathering at Bendigo is to take place on the 2nd and 3rd of January.

On Friday afternoon two houses were burned down at Williamstown, not anything being saved, notwithstanding that every assistance was rendered by the inhabitants and some persons from H.M.S. Victoria.

The Melbourne Botanic Gardens are closed to the public on Saturdays except on payment of an entrance fee.

There is to be a stone bridge erected forthwith at the Caledonian Creek, near the Plank Road, Ballaarat. It is to be the full width of the road, or sixty-six feet from side to side.

Sickness of a most fatal character is prevalent at Back Creek. The mortality is especially great among children.

The starting of the various crushing machines at Reedy Creek has told upon the Kilmore escort, which this week amounted to nearly 1400 ounces.

A woman named Hulkes has poisoned herself at Sandhurst by taking strychnine.

A slight melee has taken place on the Eureka diggings among a party of Chinese. Picks were brought into requisition, but the damage does not appear to have been very considerable.

Leprosy has made its appearance among the Chinese on Golden Point, Ballaarat.

The annual musical festival of the children attending the National Model Schools came off on Friday afternoon. The walls of the building were ornamented with some fair specimens of drawing by the pupils.

The Bendigo Philharmonic Society gave their first concert on Thursday evening with marked success. The programme contained selections from Haydn's Creation, Mozart's Twelfth Mass, and the Messiah.

It is said that a mineral effervescent spring has been discovered on Spring Flat, near Daylesford.

Mr. Drew, the Irish comedian, is drawing large houses at Sandhurst.

Three schedules were filed in the Insolvent Court on the 23rd instant, the total liabilities in which were, £8499 10s. 7d.; assets, £656 4s., a large amount of which were bad or doubtful debts, thus leaving a deficiency of £7743 6s. 7d.

With reference to the Victorian new Land Bill, the *Bendigo Mercury* remarks:—The more we look at the Government Land Bill the less we like it, the more glaringly apparent becomes the imposition which it is attempted to foist off on the public. It has been framed with a good deal of tact, for read superficially it has the aspect of a very liberal measure, and the majority of those who peruse it do so superficially. It says to the public, "you have desired free selection after survey, and you shall have it, the whole country shall be open to you, barring the good land, which being of especial value, we will have a special price for." Now is this not tricking the public? Their hope has been that a time would arrive when, by the aid of their judgment, they would be able to find each man the description of land he required, and that the law would protect them from the keen competition of the speculator. But as the bill is framed they don't require this protection, for it leaves them none but the least desirable land, and for this the speculator never has had and never will have any partiality.

Cricket.—On Monday the 26th instant a match was played on the ground near the University, between the eleven selected from the Newtown Club and the Petersham Club, in which the former were victorious, beating the Petershams by fifty runs.

Almanacs for 1860.—Other two of our most useful almanacs have just issued from the press, viz., Moore's "Australian Almanac and Handbook," a 12mo vol. of some 200 pages, and his "Commercial Sheet Almanac." They are compiled with great care, contain a vast amount of useful and valuable information, and are printed in a neat compact form.

The Queanbeyan Correspondent of the *Goulburn Herald* writes:—Information having been given to the Queanbeyan police that a noted and daring cattle stealer named Andrew Tyrie, for whose apprehension a warrant has been issued some time ago, would probably eat his Christmas beef at a cattle station belonging to Mr. Antill, they proceeded to the spot, regardless of the day, and with their usual promptitude—although they found the thief quite prepared (himself and his mate being armed) they did not hesitate to charge upon them in the most fearless and intrepid manner. Owing to the prudent disposition of his forces by Mr. O'Neill, our chief constable, Tyrie was cut off from his retreat (the slipprails) and was compelled to clear a high stockyard fence, followed in gallant style by the chief. The mate, however, being worse mounted, struck the fence, and unfortunately carried away a couple of panels, hotly pursued by constable Ditcham. We understand that Tyrie's horse was shot under him by one of the balls from Mr. O'Neill's revolver, and that constable Ditcham narrowly escaped, having had a piece of his holster shot away. As all the police have not yet returned from the pursuit we cannot say what has been the result, but trust that none of them may fall victims to these ruffians.

An inquest was held on the 25th instant, at the Goulburn Hospital, before the district coroner, Mr. R. Waugh, on the body of an old man named Joseph Dabbs, who had died there on the previous day. It appeared from the evidence that deceased was brought into the hospital on Saturday afternoon, suffering from a compound comminuted fracture of the right leg; he was then under the influence of liquor; and after his admission he informed Mr. Hollis that he had previously been drinking very hard; that it was in consequence of his being tipsy that the accident took place, and he blamed no one. He was brought in by a young man who was quite sober, and who stated that the injury was received about seven or eight miles from Goulburn, in the Bungonia direction. Deceased was being conveyed home on a dray, and when within a short distance from the house, his leg by some means got between the spokes of the wheel, and was twisted and crushed in a frightful manner. The wheel was covered with blood, mingled with portions of marrow, the ground for some distance being marked with blood. The jury returned a verdict in accordance with the evidence. Deceased, who was sixty-six years of age, had been in the country thirty years. He was married, his wife living in Sydney.—*Goulburn Chronicle.*

Corrora, 22nd December.—The correspondent of the *Mudgee Newspaper* says:—The harvesting operations are now all over at this place, and the weather has been most propitious. Mr. Rouse's machine, used on his property here, very soon made clean work with the assistance of plenty of men to gather and bind, the whole of which has been stacked and secured under the management of his overseer, who but recently recovered from a severe attack of illness. Ploughing is of course retarded for want of rain, and on the ground becoming properly moistened, there is plenty to be done by the farmers here.

Manly Beach.—This favourite place of resort, which proved a source of attraction to upwards of 10,000 persons on last Monday, has put forth the same tempting inducements for Monday next, with this improvement, that the proprietary have made such arrangements as will prevent the possibility of parties being disappointed in receiving every requisite that can in any way conduce to their comfort; together with sufficient steamers for the conveyance of visitors there and back. Extra tents have been erected in the vicinity of the pier, fitted with tables, &c., capable of accommodating 400 persons at one time, in addition to the large apartments attached to the hotel; the most fastidious will, therefore, have little cause to complain on this occasion.

Funeral.—The Friends of Mr. Mason are respectfully invited to attend the funeral of his late departed son David, this (Saturday) morning, at 8 o'clock. The procession will move from his residence, Kent-st. North, at the above hour precisely. C. KINSELA and SON, undertakers, Sussex-street South.

New Year's Day.—Dancing, Dancing.—Manly Beach.—Mr. NEWMAN, proprietor of the Fairy Nook, Manly Beach, begs to inform his friends that the splendid Dancing Marquee, 105 feet by 18, will be open for dancing on New Year's Day. The musical department will be under the supervision of Mr. Crow, violinist, a gentleman whose name is a sufficient guarantee for the band, &c. Refreshments of every kind provided on the grounds. Oysters, &c.

New Year's Ball.—A Plain and Fancy Dress Ball will take place at the Rotunda, South Head Road, on MONDAY EVENING, January 2nd. Double tickets, to admit a lady and gentleman, 4s.; single ticket for a lady 1s. 6d., gentleman 2s. 6d. A full Quadrille Band will be in attendance. Dancing to commence at half-past eight o'clock.

Notice. — Certificates for Goods under Bond.—It having been deemed advisable for the protection of merchants and owners of goods in the Bonding Warehouses, to cause the certificates issued by the warehouse keepers, for any goods lodged in their respective warehouses, to be produced at the Custom-house, when entries are passed for such goods, either for home consumption or exportation: Notice is hereby given that, from and after the 1st day of January, 1860, all such certificates must be lodged with the Customs' Warehouse Officer, for the purpose of being stamped before they are issued to the owners of the goods, and no person will after that date be allowed to pass entries for such goods for duty or exportation, without the production of the certificate in each case. With regard to goods warehoused previous to this notice, the existing unstamped certificates must, in like manner, be produced in proof of ownership, before entries for duty or exportation are passed.
W. A. DUNCAN, Collector of Customs.

Notice.—In consequence of an advertisement, unprecedented in commercial usage, appearing in this day's Herald, headed "Caution," and signed "Flower, Salting, and Co.," the undersigned considers it to be a duty enforced on him in self-defence, and to prevent, if possible, any false impression or inference detrimental to his character, to acquaint the public that he was recommended to the notice of that firm at the commencement of the present year, and undertook the sales of their stock of Adelaide flour, and completed the same, to a large extent, having the responsibility of selling and collecting, and was complimented by its constituents for having done so satisfactorily, and was then further solicited to undertake any further sales required. The present arrangement with the undersigned was for the sale of barrel flour, commencing on the 17th of the present month, and then on the 29th, when, at the time of some anticipated improvement in the markets, his authority is withdrawn, by a capricious advertisement of an injurious tendency.
THOMAS ELLEN.
St. John's Cottage, Darlinghurst, December 30th.

To the Stockholders of New South Wales.—Mr. E. J. BLAXLAND, of Newington, on the Parramatta River, begs to notify that he has just completed an extensive slaughtering establishment at Newington, and is now prepared to purchase fat cattle and sheep, for which he will give the highest price; he requests, therefore, that all persons having suitable stock for sale will communicate with him as above, and he will at once dispatch a competent person to complete the purchase. Mr. Blaxland's object is to slaughter fat stock both on his own account, and also any that may be entrusted to his disposition, for the regular supply of the Sydney market, in consequence of the Sydney slaughter-houses ceasing operation on the 1st of January next; and he begs to inform the settlers of the colony, the wholesale, the retail butchers of Sydney, and the public generally, that he has built a commodious and well-shaded steamboat for the safe conveyance of the carcases to the market, which he intends selling by public auction. He will, therefore, hold a sale every morning and evening at a convenient wharf, to be named shortly, and he invites the support of the trade.

The arrangements are so complete for retaining and feeding cattle in his numerous, secure, and well-watered paddocks, comprising 1200 acres, besides slaughtering stock, and the immediate transit of the carcase to Sydney without manual contact, that the meat will be in the highest state of preservation in the hottest weather, and will be ready for sale within two hours after killing.

The capabilities of the establishment will enable Mr. Blaxland to slaughter and deliver seventy bullocks daily, besides sheep, and, as the whole business will be under his personal supervision, the greatest advantages will be afforded to the graziers, the butchers, and the public generally.

Notice.—If the PERSON who was THROWN on Saturday last, from a Roan MARE (branded like IO with — over O on the off shoulder, and J square on the near shoulder, very much saddle marked, star in forehead), does not call for the above mare by SATURDAY next, I will place the same in pound. R. HASLAM. Grose Farm Tollgate, December 29th.

Caution.—Fotheringham Estate, at the junction of the Stanmore and Enmore Roads, Newtown. Any parties cutting or removing the TIMBER or FENCES on the above estate, will be prosecuted; and a reward will be given by the undersigned to any one giving such information as will lead to the conviction of parties so offending. R. P. RICHARDSON, Bank-buildings, George-street.

Caution.—Whereas, on Saturday evening, the 24th December, a Glazed Black Canvas TRAVELLING BAG was taken from the Railway Station at Liverpool, containing wearing apparel and jewellery, the property of J. B. Watson, surgeon, of Liverpool. Whoever will give any information respecting the same, that will lead to its restoration, will be handsomely rewarded. Liverpool, December 27.

Peter J. Wood, Government Surveyor, late of Armidale, New England. All persons are informed that any ACCOUNTS against this gentleman, or cheques drawn upon the Armidale Bank will be paid on presentation to ARTHUR F. WOOD, Surveyor-General's Office, Sydney.

All Parties holding certificates for Goods in Smith's Bond, Sussex-street, are requested to present them to Campbell's, whither the goods have been removed. SMITH, BROTHERS, and CO., December 30.

£50 REWARD.—Spurious Imitation of Holloway's Pills and Ointment.—Fifty pounds will be paid to any person giving information to Mr. John Hughes, wholesale Druggist, Melbourne, that shall lead to the conviction of any person or persons vending spurious imitations of Holloway's Pills and Ointment.

A power of attorney has been sent to Mr. Hughes, bearing date 9th August, 1859. It appears that parties in Melbourne are either manufacturing Holloway's Pills and Ointment, or importing imitations of the same from the United States; such parties, when discovered will be dealt with according to law, in order to protect the public.

The genuine Ointment and Pills have engraved on the British Government Stamp the words, "Holloway's Pills and Ointment, London," and if the little books of directions wrapped round the medicines be held up to the light, the same words will be discovered woven in the water-mark of the paper. None are genuine without these marks, and without the Government Stamp.

The public of Australasia is respectfully invited to join with the proprietor of these medicines in his endeavour to trace out those who are practising this fraud upon them, and to give information of the same to Mr. John Hughes.
(Signed) THOMAS HOLLOWAY.

FAIRY BOWER, MANLY BEACH. — Under the patronage of all the Elite of New South Wales.—The proprietors of this unequalled and highly favoured spot begs, with feelings of gratitude and respect, to acknowledge the flattering support which has distinguished the Fairy Bower since its commencement, and at the same time to express his deep regret at the disappointment occasioned by the insufficient supplies for the thousands who favoured the Fairy Bower with their presence on Monday last; also at the disappointment of the band. The public is now respectfully assured that an ample supply has been provided to meet every demand for MONDAY next. A fifty-gallon copper boiler has been fitted up, so that there will not be a moment's delay for tea and coffee, the superior quality of which has always distinguished the Fairy Bower. Everything will be carefully prepared beforehand and twelve waiters will be in attendance that orders may be executed with despatch. Each bower and table will be numbered, so that the number may be given with the order to preserve regularity and prevent mistakes. A good band of music will positively be in attendance, and a highly respectable gentleman has kindly offered to take the management of the dancing, which will ensure its respectability and good order.
To those numerous patrons of the Fairy Bower it is not necessary to give the following caution, but as many strangers have been induced to believe a place called the Fairy Nook was the Fairy Bower, and have been miserably deceived, it is well to mention that the said Fairy Nook has no connection with the Fairy Bower, and certainly bears no resemblance to the same.
Lists of prices will be placed in the different bowers, and which will defy competition.
C. F. HEMINGTON.

MANLY BEACH!—To the Citizens of Sydney, and Patrons of the Pier Hotel.—In returning my grateful thanks for the extraordinary and quite unexpected patronage given to me on Monday last, I think I am bound to explain to the parties who could not obtain a seat at my ordinary on that occasion, that their disappointment arose rather from impatience than want of supplies, as my arrangements were made for the accommodation of one thousand persons in the saloon (weather permitting), nor was I at all deficient in material, but at daybreak on the day in question, I had no prospect of seeing the boats crowded with ten thousand passengers.
Those persons who failed in getting a passage from Sydney, or who could not get their dinner or sandwich on that occasion, may safely rely on an extensive preparation being made for them on Monday next (New Year's Day), when every thing conducive to their personal and creature comforts shall be made by me adequate to the occasion.
Arrangements have also been made to secure a more extended steam communication to and from Manly.
With many thanks for the past favours, I beg to subscribe myself their obedient servant,
JAMES T. GROCOTT.

Mr. GROCOTT will take care that no lack of supplies shall occur on MONDAY next.

MANLY BEACH. MANLY BEACH.—GEORGE BIRCH, of the new Brighton Hotel, Manly Beach, cannot allow the great kindness of the many visitors who patronised his hotel on and since Boxing-day last to pass over unnoticed. The handsome manner in which all who partook of the various refreshments, specially provided for their comfort, expressed their entire satisfaction of the arrangements will most unquestionably be a further incentive to the proprietor to strive, if possible, to add more comfort still in every shape and form. The same bountiful supply of everything the appetite can require will be again provided on the forthcoming Monday after New Year's Day, and on the same moderate charges. Again thanking his friends and patrons, G. BIRCH assures them that he will be found as usual at his post, and give a hearty welcome to all. Lack of supplies is unknown at this hotel.

HOLLOWAY'S OINTMENT AND PILLS.—A mere list of the experimental medicines used by "the profession" would fill many volumes. Yet the greatest of modern surgeons and chemists, Majendie, has told us that not one of these can be uniformly relied on as a specific. On the other hand, it is claimed for Holloway's remedies that in nine cases out of ten they cure those upon whom the whole "regular materia medica" has been expended in vain. From the testimony—voluminous, authentic, and emanating from all nations—this would seem to be true. There can be no question, we think, that all eruptive and ulcerous disorders, and affections of the stomach, liver, and bowels, yield to their purifying and regenerative influence.
Sold at the establishment of Professor Holloway, 244, Strand (near Temple Bar), London, and at 80, Maiden-lane, New York; also, by all respectable druggists and dealers in medicine throughout the civilised world, and in all parts of Australia, at the following prices:—1s. 3d., 3s. 3d., and 5s. each pot. ☞ There is a considerable saving by taking the larger sizes. Title, unquestionable.

R. P. RICHARDSON has received instructions to sell by public auction, at the Rooms, Bank-buildings, George-street, on FRIDAY, 13th January, at 11 o'clock,

, Both these houses are let, and at their present reduced rates are bringing in a rental of £83 4s. per annum.
☞ This property is worthy attention as a first-rate city investment. The houses are strongly built, and are in the midst of a very populous neighbourhood, where there is no lack of tenants, and an increasing demand for houses to rent, the Auctioneer can confidently recommend it to notice, as the present rentals may be safely reckoned on as a minimum income to be derived from it.

☞ As an investment the above block of city land is worthy of particular attention, for, from its position, close to the busiest part of the town, in an elevated and healthy neighbourhood, commanding extensive views of the Harbour and Parramatta River, it may be safely reckoned that any buildings erected on it would immediately find tenants at such rentals which would bring in a handsome return for the outlay.

LOT 2.—Twelve valuable allotments, situated in the GOVERNMENT TOWN of EDEN, at Look-out Point, Twofold Bay, being
Allotments Nos. 5, 6, 7, 8, 9, and 20, of Section No. 5
" " 1, 9, and 10, of Section No. 1
" " 6 and 7 of Section No. 6
" " 9 of Section No. 2
Containing about half an acre each.
, In the limits of an advertisement it is hardly possible to do justice to a property of the above description, as, independent of the many advantages it now possesses as a shipping port, backed by one of the richest districts of New South Wales, it cannot fail to participate largely in the progress which private enterprise is now making for Twofold Bay, and hence become enhanced in value to an unlimited extent.
Amongst some of its advantages as a port, may be enumerated the following, viz.—
1. It has about 1½ miles frontage to the Bay, and is also well supplied with fresh water.
2. There is abundance of fine timber, suitable for houses and ship-building, fencing, coopers' work, treenails, and all other sorts of marketable timber.
3. It possesses many eligible sites for coal depôts for steamers in the Sydney and Melbourne trade, also sheltered anchorage for coal hulks.
4. A splendid climate; in proof of which it may be mentioned that Maneroo beef, salted there, has been sent to England in prime condition.
5. It is only about 24 miles from Maneroo, and possesses peculiar natural advantages for shipping stock for the adjoining colonies of Tasmania and New Zealand. Hay is procurable in any quantity from the farmers near Kiah River.
6. Bay whaling has been carried on there in times past with considerable success—as much as £2000 having been realised by the late Mr. Boyd in oil and whalebone in one season.
It is quite unnecessary to enter into fuller particulars. The many advantages which Boyd Town possesses are at once apparent, and as it only requires an inconsiderable capital to put the present buildings in working order, it is a sale which should not be overlooked.
An enterprising man of business or a company, who would introduce energetic measures for opening up a trade with the settlers, whose vast herds and flocks cover the surrounding country, would soon find a handsome return for their outlay.
LOT 3.—THE ALTHORNE ESTATE, in the county of Northumberland, containing 2260 acres, more or less, situated on the west coast of the TUGGARAH BEACH LAKES, and bounded on the north by the WYONG CREEK, being the land described as No. 5 in the Government notice of the 25th May, 1831.
, This large lock, it will be noticed, has very extensive water frontage, and is an early selection.
LOT 4.—Two valuable building allotments at MILLER'S POINT—one situated in MUNN-STREET, with a frontage of 33 feet, and the other immediately adjoining it, having a frontage of 24 feet 6 inches to WINDMILL-LANE.
, The position of the above allotments, either separately or together, as a site for stores or other business premises is excellent. They are close to Captain Smith's Wharf, and the extensive premises of Messrs. R. Towns and Co., and H. Moore, Esq.
LOT 5.—An ALLOTMENT of LAND at the corner of LONG'S-LANE and JUNCTION-LANE, CUMBERLAND-STREET, having frontages of 18 feet 6 inches, and 62 feet respectively.
☞ In bringing the above valuable and extensive freeholds forward for public competition, Mr. Richardson would direct the special attention of capitalists, speculators, and others, to the fact that the properties will be offered for absolute sale, as it is the desire of the official assignee to bring to a close the above estate, so far as these properties are concerned.
Plans on view at the Rooms.

MUMMEL ESTATE, GOULBURN.
Without reserve.
By order of the Mortgagee.
Two splendid Agricultural Farms, containing 224 acres, on the above estate, near Goulburn.

R. P. RICHARDSON has received instructions to sell by public auction, at the Rooms, Bank-buildings, George-street, on MONDAY, 9th January, at 11 o'clock.
All that parcel of land in the county of Argyle, colony of New South Wales, being portion of 2000 acres granted to —— Ross, known as
MUMMEL ESTATE,
marked in the plan of said estate as lot No. 2, of the small farms, containing by admeasurement 89 acres 2 roods and 16 perches.
And also, all that block of land situate as aforesaid, marked in the plan as lots Nos. 8, 9, 11, and 13, containing by admeasurement 134 acres 1 rood and 33 perches.
☞ The above are well-known blocks of agricultural land on the celebrated Mummel Estate, the reputation of which as a first-class district is so well known as to need no comment. The whole will be positively sold to the highest bidder, and the sale affords an opportunity for advantageously investing in good country land which is increasing daily in value as the Great Southern Railway progresses towards it.
Plan on view at the Rooms.

POSITIVE and UNRESERVED SALE.
FOTHERINGHAM ESTATE, NEWTOWN, containing an area of about 20 ACRES, at the junction of the ENMORE and STANMORE ROADS, opposite ENMORE HOUSE and grounds and the KINGSTON ESTATE, and close to the NEWTOWN RAILWAY STATION.
Title—Unquestionable. Full particulars of which can be ascertained on application to R. J. WANT, Esq., solicitor, Pitt-street.
Terms—One quarter cash. The residue may remain secured on the property for a term of years at a low rate of interest.

R. P. RICHARDSON has received instructions to sell by public auction, ON THE GROUND, on TUESDAY, 17th January, at 11 o'clock,
The whole of that beautifully situated property, known as FOTHERINGHAM'S ESTATE, Situate at Newtown, a few yards beyond THORNBY, the residence and grounds of T. C. Breillat, Esq., also close to the Cook's River Road and the Railway Station.
This valuable property has been subdivided into allotments containing about HALF AN ACRE each, but in such a manner that the purchaser can secure, if desired, ONE TO FIVE ACRES in one lot; and it is introduced into the market in this form to satisfy the daily increasing demand for SUBURBAN VILLA SITES, close to the city, of sufficient extent to allow of the formation of gardens, paddocks, &c.
The estate is beautifully situated, surrounded by first class properties, and being only a few hundred yards from the Railway station, and also close to the omnibus stand at the railway bridge, has constant communication with the city.
The whole will be disposed of to the highest bidder on the day of sale, and an opportunity will then be afforded for securing, on remarkably liberal terms, a really choice site, in a most convenient and first-class position.
Intending purchasers are especially invited to inspect the estate prior to the sale, and as all the streets are turf-lined and the lots pegged, and the numbers as per plan affixed, with the aid of a lithograph which can be obtained at the Rooms, a selection can be made without trouble.
Large plan can be seen, and further particulars obtained, at the Rooms.

MORT and CO. have been instructed by Messrs. Berry and Holt to sell by public auction, at the Rooms, Pitt-street, at 11 o'clock, on TUESDAY, 24th January, 1860,

That truly first-class sheep and cattle property, situated in THE BURNETT DISTRICT, and well-known as THE RAWBELLE STATIONS.

These splendid runs occupy a vast extent of some of the very finest country in the Northern Districts, and may be truly said NOT TO BE MORE THAN HALF STOCKED. They are very conveniently situated for water carriage, being only about 120 miles from Port Curtis, and for fattening purposes cannot be surpassed, and the general character of the runs is best tested by the fact that in adverse seasons they have had fewer losses and larger increase than any other stations in the district.

THE IMPROVEMENTS comprise everything requisite for the residence of the proprietor as well as the full working of the stations, and are as follows:—

AT THE HEAD STATION.—A comfortable verandah cottage residence, floored and shingled, with detached kitchen, &c., and enclosed flower garden; superintendent's residence, overseers' and storekeeper's huts, and three huts for labourers; store, sunk dairy, well, and smith's forge with all the necessary apparatus, shed and horse-yard, stockyard with milk bails and calf-pen, a large horse paddock, and two large vegetable gardens. Also a large woolshed with rack press, and drafting yards, the latter capable of holding upwards of 20,000 sheep. There is also a fenced standing yard at the washpool.

There are 10 out-station huts, with large dog-proof sapling yards at each; as well as 10 gunyahs, with similar yards.

AT THE CATTLE STATION there is a good verandah hut, and dairy; a large and secure horse paddock; also an extensive and substantial stockyard, capable of holding 2500 cattle, consisting of eleven divisions, with swinging gates, and every convenience for drafting cattle; together with detached milking yard.

With the Rawbelle Stations will be sold the following stock:—
35,000 SHEEP, more or less, and
2,500 CATTLE, more or less.

The SHEEP (of which full particulars will be published shortly) are equal to any in the district.

The CATTLE are a first-rate quiet herd, famous for weight of the bullocks, of which there are now a large number ready for the butcher.

. About 30 working horses and mares, a few brood mares and young stock, together with teams, drays, stores, implements, &c., to be taken at a valuation.

☞ The Rawbelle property is disposed of in consequence of the dissolution of partnership by effluxion of time, and Mr. Berry's immediate return to England. It is not only one of the oldest, but it has been one of the MOST PROFITABLE STATIONS in the Northern districts. Mr. Berry and his family have resided at Rawbelle for several years past, and therefore the purchaser will doubtless find a comfortable home. The fame of these stations and the excellence of the stock are so fully established that MORT and CO. deem further comment unnecessary. An inspection of both the runs and stock is earnestly invited. There is ample time for it prior to the sale; and intending purchasers, by applying to JOSEPH BERRY, Esq., at Rawbelle, will be afforded every facility for doing so.

☞ These stations adjoin, and may be worked together, with additional advantage. They are parted with merely because the proprietor now finds himself in a position to realise, and contemplates visiting Europe. They are both well known, and in preference to swelling an advertisement with lengthened details, MORT and CO., would request an inspection, satisfied that any one in search of a good homestead and paying property, will find these all they desire. Intending purchasers will be furnished with letters to the proprietor, who resides at Rock Vale, to enable them to inspect the properties prior to the sale.

NICHOLS' ESTATE, NORTH SHORE.
ABOUT THREE MILES FROM ST. LEONARD'S.

20 CHOICE FARMS, each containing from 7 acres to 14 acres, being according to the original subdivision of the Estate, and equal to any of the finest ORANGE AND ORCHARD LANDS OF LANE COVE DISTRICT.
Title, Unquestionable.
Terms at Sale.

MORT and CO. have received instructions to sell by public auction, at the Rooms, Pitt-street, at 11 o'clock, on WEDNESDAY, 18th January, 1860,

208¾ acres of land on the North Shore, being SELECTIONS FROM THE NICHOLS' ESTATE, and which will be sold in 20 CHOICE FARMS.

In order to insure the greatest accuracy, these farms have been recently re-surveyed according to the original subdivision of this well-known estate.

Those now offered include some of the very FINEST PORTIONS of the PROPERTY. Each lot contains from 7 to 14 acres, with frontage either to the LANE COVE ROAD, or other leading thoroughfare. They are within so short a distance of St. Leonard's that, in the natural course of events, they must ere long BECOME a PART of that RISING TOWN.

It is well-known that the orangeries and orchards of Lane Cove are now the great support not only of the Sydney fruit markets, but also of Melbourne and the other metropolitan cities of Australia. The lands now advertised are equal to any in that FAR-FAMED FRUIT DISTRICT, and as they are in the market for positive sale, the opportunity of securing such choice lands ought not to be neglected.

. The position of this splendid estate is so well known, that MORT and CO. deem it unnecessary to enter into fuller particulars. Parties, however, who may be desirous of inspecting the various blocks prior to sale will be furnished with fullest particulars on application at the Rooms, Pitt-street.

Large plan on view.

120 ACRE DAIRY AND AGRICULTURAL FARM
LORD'S FOREST. GANNON'S FOREST.
Title unquestionable.
Terms at sale.

MORT and CO. have received instructions to sell by public auction, at the Rooms, Pitt-street, at 11 o'clock, on WEDNESDAY, 4th January, 1860,

A comfortable homestead and dairy and agricultural farm, at Lord's Forest, near Gannon's Forest. It contains 120 acres, the greater portion of which are rich cultivation land. About 14 acres have been stumped, and are now under cultivation, six acres under hay, six acres corn, and the rest vegetables and fruit trees.

The farm is enclosed with substantial two and three-rail iron bark fence, and has a never failing stream of water running through.

There is a very comfortable cottage, containing four good rooms and out buildings; also a capital well of water, a six-stalled stable, a good stockyard, and two men's huts.

On the farm, and fronting the main road, is a blacksmith's shop and hut.

☞ MORT and CO. are requested to direct attention to this property, which is in every respect really desirable; its distance from Sydney only NINE MILES. Its position, having HALF A MILE FRONTAGE to the NEW ILLAWARRA ROAD, the character of the soil of a very superior description, the timber evidencing its fertility and richness, a never failing SUPPLY OF WATER, and its contiguity to the NEW CHURCH and SCHOOLS, being recommendations which not often can be offered. These and many other advantages, which a personal inspection will make manifest, give to this property a value which should not be lost sight of.

☞ There are working horses, drays, bullocks, teams, cows, utensils, &c., indeed everything required to work a farm properly, all of which, at option of purchaser, may be taken at a valuation.

Mr. BARDEN, the owner is now on the farm (which is well-known as Bates'), and will be glad to show it to any intending purchaser.

and are also watered by several tributary creeks, permanent waterholes, and reservoirs. They consist of
FATTENING COUNTRY EQUAL TO ANY IN AUSTRALIA.
and are bounded by the runs of Messrs. Pearson, Jones, Macfarlane, Tyers, and Turnbull, which will give some faint idea of their extent. They are also ENCLOSED AND SUBDIVIDED BY ABOUT 51 MILES OF FENCING, eleven miles of which have been erected by neighbouring proprietors, leaving about forty miles belonging to the Ridge Property. Upon each of these runs there is a section of freehold, which, together with 108 acres near the township of Rosedale, complete the 2028 ACRES OF PURCHASED LAND. Upon one of these sections stand the PRINCIPAL HOMESTEAD BUILDINGS, including—

A comfortable dwelling-house of six rooms, passage, verandah, large cellar underneath, and with shingled roof.

Upon the purchased land, near the township of Rosevale, are the following improvements, enclosed in a paddock of about 50 acres.

SANDY ISLAND is situated in the harbour of Port Albert, and is capable of carrying 1500 sheep without a shepherd. It is not stocked at present.

The barque HELEN S. PAGE, of about 300 tons, fitted for the cattle trade, capable of carrying 90 bullocks to Hobart Town, and constantly engaged. This vessel is well found, in full repair, and in good order.

THE RIDGE STATIONS have established so far and wide, and so deserved a celebrity, that comment upon the above simple details would be superfluous. They constitute beyond doubt one of the MOST SPLENDID FATTENING PROPERTIES IN AUSTRALIA.

Mort and Co. would content themselves with reminding the public that it is seldom such a property can be obtained, and they would therefore recommend all those who can entertain the purchase, not to permit the present opportunity of securing one of the MOST PROFITABLE INVESTMENTS IN THE COLONIES to escape them.

. Intending purchasers are solicited to inspect the property, in order that they may be the better assured of the very superior quality of both cattle and runs, and the complete state of the whole.

Their proximity to market, and their established reputation as fattening runs, are facts that ought not to be lost sight of. By the older members of the squatting community they will be more readily recognised as having formerly belonged to Messrs. KINGHORNE and CAMPBELL, by whom they were most profitably worked.

Attached to the hotel are 18 ACRES of land at the JUNCTION of the ROCKY POINT and KUGGERAH ROADS, with a large road frontage, and extending back to, and having a similar FRONTAGE TO PATRICK MOORE'S SWAMP. The land is inclosed with a three-rail fence along the road, and a two-rail fence on the side boundaries leading down to the Swamp; and there is a quantity of fencing stuff on the ground. About six acres have been cleared, part of which is now under cultivation. There is also a small VINEYARD, in FULL BEARING.

☞ This snug property is distant about eight miles from Sydney, and about two miles beyond the Cook's River Dam. It adjoins that WELL-KNOWN PROPERTY, PAT MOORE'S FARM, immediately at the junction of the Rocky Point and Kuggerah Bay Roads, and consists of some of the very best land in the parish. Apart altogether from the profits of the public-house, which are considerable, any industrious family who might be disinclined for that line of business would here find a comfortable homestead, and all the means of a LUCRATIVE INVESTMENT, combined with the healthful pursuits of a country life. The land is good, the access to Sydney markets easy and quick, so that the cultivation of green crops, fruit, and vegetables, in connection with dairy produce, would yield a most profitable return.

. Parties wishing to inspect the property are requested to apply to Mr. THOMAS PENDERGAST, on the premises.

TO BANKING, Insurance, and other public Companies, Merchants, Storekeepers, &c.—Messrs. SANDS and KENNY beg to announce the receipt, ex recent arrivals, of large additions to their stock of STATIONERY, and desire to direct especial attention to the unusual facilities possessed by them both in this city and in Melbourne, for conducting in the most efficient manner the stationery trade in all its branches.
A leading feature of their business has always been the manufacture of ACCOUNT BOOKS, in the production of which they spare neither pains or expense; and with the greatest confidence they state that for quality of material, excellence of workmanship, and reasonableness of charges, the account books manufactured by them will bear favourable comparison with anything of the kind produced in the English metropolis. As a proof of this, they are happy to say that they already enjoy the patronage of most of the banking and other public companies, and leading mercantile firms both here and in the neighbouring colonies.
To ensure their being always in possession of an ample stock of the best hand-made and machine-made papers, Messrs. S. and K. have made arrangements, through their house in London, with one of the first paper manufacturers in Kent, for continuous periodical shipments; and, as the extent of their purchases in this and in other prominent departments, give them peculiar advantages, it is evident that they are in a position to supply the public on the most advantageous terms.
Their stock, having lately undergone a careful revision of prices, is now, both for imported goods and those manufactured on the premises, calculated, they are confident, to give satisfaction to their numerous constituents and the public generally.
SANDS and KENNY, stationers, account-book manufacturers, printers, and publishers, 392, George-street, Sydney, and 51, Collins-street, Melbourne.
